

ROBOT TRANSPORT UNITS - RTU

Precise Linear Movement for Robotic Applications

The MITUSA Robot Transport Units (RTU) are ideal for all your robot transport requirements. Designed and built in the USA, the MITUSA RTU can be utilized on your welding, material handling, painting or part positioning application. The MITUSA unit is the quickest RTU to assemble. We have 12 planers in house, which makes us ideally suited to meet your requirements for length and on-time delivery.
