

Introducing K-TIG Advanced Welding Systems.

"Proven Solutions to Produce Your Parts"

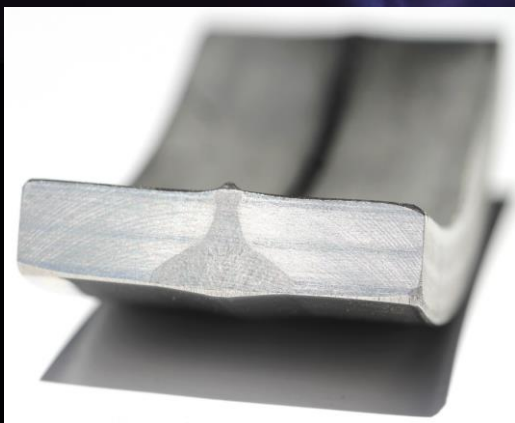

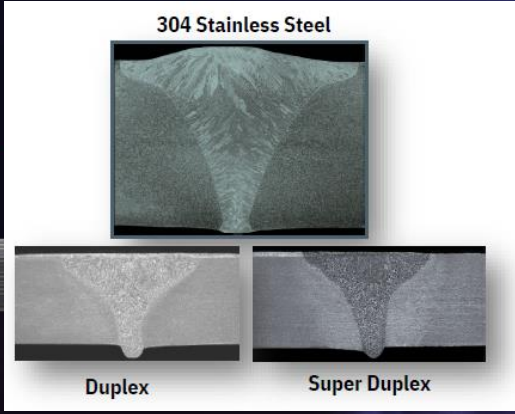

ADVANCED WELDING SYSTEMS

We are proud to announce Australia-based welding manufacturer K-TIG has expanded its reach across North America with the appointment of MITUSA Inc. as a new Tier 1 distributor to supply its products in the U.S. and Mexico. K-TIG is an advanced GTAW technology that reduces multi-hour welds to just minutes whilst retaining the sought after high quality of conventional TIG processes. In addition to speed advantages the K-TIG technology significantly reduces power, gas consumption and labour costs. K-TIG meets the most demanding requirements of the Nuclear, Aerospace & Defence industries. Please feel free to ask us about any test samples you would like done.
